FOLLOW-UP CONSULTATION NOTE

Date: 20/06/2026 | Patient: Demo Patient (Age: 52, Male)

Review of Symptoms

Patient notes partial improvement in fatigue. Weight steady at 78 kg.

Current Medications

- Metformin 500 mg once daily (reported good compliance).

Assessment

- Suboptimally controlled Type 2 Diabetes Mellitus (HbA1c 8.0%).

Plan

Maintain current therapy; prepare for dose intensification if glycemic target not reached in autumn.
